Software Engineer with 4 years of experience building scalable and maintainable web applications, API services, and mobile applications. Proficient in JavaScript and JavaScript-based technologies. Knowledgeable about the best practices and enterprise-standards in architecture. Looking forward to work on projects that has good opportunities for learning.

Experience

Neudesic
Consultant II
⊘ https://www.neudesic.com

June 2022 to Present
Kochi, Kerala

- Architected and developed a comprehensive API template which is being used as the base for all API services of a major airline in India.
- Built and deployed numerous API services for the airline's ticket booking platform, now being consumed by millions of users worldwide.
- Engineered a sophisticated cryptography service for an international fertilizer company which now sits on top of their database instances.
- Improved code quality of microservices by introducing best practices in unit and E2E testing and achieved 100% code coverage consistently.
- Contributed extensively to internal-use projects and template repositories by developing pixel-perfect user interfaces for them.
- NestJS, Express, Node.js, PostgreSQL, MongoDB, Kafka, Domain-Driven Design, Microservice Architecture, Angular, Azure Pipelines.

Bititude
Software Engineer
⊘ https://www.bititude.com

July 2020 to June 2022
Calicut, Kerala

- Created reusable and extensible components from scratch for Calendar and Table, which are now being used on multiple projects.
- Implemented a fully-featured real-time video conferencing system with integrated chat functionality for conducting live classes in an LMS.
- Led and mentored a small team of interns throughout the lifecycle of a project, training them and ensuring that milestones were met in time.
- Wrote detailed documentations for sophisticated components which motivated the creation of a component library used organization-wide.
- Conducted workshops on various topics related to technology and actively involved in creating modules and tutorials for training interns.
- React, Redux, React Native, Angular, WebSockets, WebRTC, Express, Node.js, MySQL, MongoDB, Redis, Jest, Cypress, Docker, AWS EC2.

Education

St. Xavier's Arts and Science College
Calicut, Kerala
⊘ https://www.stxavierscollegecalicut.edu.in

2017 to 2020
Bachelor of Computer Application

- Started a web development firm with a few friends and successfully served a good number of clients before exiting from the company.
